

FISCAL NOTE

HB 2009 - SB 1981

March 14, 2003

SUMMARY OF BILL: Updates the minimum energy conservation building codes for new construction with new standards known as *The 2002 International Energy Conservation Code with 2002 amendments, published by the International Code Council.*

ESTIMATED FISCAL IMPACT:

Increase State Expenditures - Not Significant

Increase Local Govt. Expenditures - Exceeds \$100,000

Estimate assumes:

- Because the state has been working under a stricter set of guidelines than required by current law, increased expenditures will be not significant.
- Some local governments have only required the minimum standards specified by state law. Therefore construction expenditures will rise.
- There will be a cost to local governments to train building inspectors on the changes to the law.

CERTIFICATION:

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.
